GENERAL INDEX TO VOLUME 88

JANUARY—DECEMBER, 1944

January	Pages 1– 72
February	" 73–142
March	" 143–214
April	" 215–286
May	" 287–356
June	" 357–428
July	" 429–500
August	" 501–572
September	" 573–646
October	" 647–718
November	" 719–792
December	" 793–862
Mid-December	" 863–920

A

ACCIDENTS AND ACCIDENT PREVENTION

Explosion-proof motors for hazardous-gas locations. E. F. Wehlage.....*517
Idler wrecks 50-year old steam engine.*324
Masks or respirators to fit the job. B. J. George *609
Operator changes remove window hazard. M. N. Gozdenovich.....*617
Safety belts for dangerous places.....*542
Standard machinery safety guard (Power's Data Sheets).....*201

AIR COMPRESSORS

Adapter for air-driven screwdriver.....*834
Aftercooler for dry compressed air. H. B. McDermid *763
Air compressor with air intake outside. Di Santo, Elkins, Greer, Clark, Bongiorno, McNally, Cunningham.....*620
Check list for power planning..... 798
Compressed air receiver drain freezing. Breen, Wyborn, Russell, Gozdenovich, Salviani, Bongiorno, Clark, Wenig, Butcher *263
Compressors and fans..... *98
Converting a double-acting air compressor to oilless operation. C. H. Tucker *41
Critical pressure limits gas flow in pipes. Prof. R. C. Binder.....*154
Curing compressor ills saves money. H. H. Miller *669
Diesel engines and air compressors need clean air. A. R. Ciotti..... 471
Don't overlook gas laws that affect compressor efficiency. H. H. Miller.....*363
Dual control keeps compressor on the job. Carl Bachman.....*186
Hold down preventable losses on compressors. H. H. Miller.....*514
Moisture in compressed air. Frank Faast 278b
Operates feed pump with compressed air. M. N. Gozdenovich *114
Pine wood substitutes for rubber mounting. A. H. Parker..... 834
Snug ring fit prevents oil pumping and blowby. Terry Mitchell (Refrigeration Notebook) *122
Twin-compressor control. F. M. Swengel *614

AIR CONDITIONING

Air conditioning system in the control room. Martin, Butcher, Seelig..... 262
Automatic valve changed for manual operation. Carl Bachman *471
Heating and air conditioning.....*102
Maintenance check list for air conditioning units. H. R. Jaeggli.....*600
American Institute of Electrical Engineers —Northeastern District Technical meeting *372
American Society of Mechanical Engineers —1944 annual meeting.....*897
Spring meeting *323
Tulsa meeting discusses what's ahead for diesels *464
American Society of Refrigerating Engineers—Philadelphia meeting *15
Australia—Power future calls for steam, hydro and diesel. J. S. Shotwell.....*746

Page

Awards—Industrial Marketing awards given to Power 778
Longstreth medal goes to Frank B. Allen 414

B

BEARINGS

Color code identifies correct lubricant for each bearing. R. M. Baker.....*589
Diesel crankshafts, connecting rods and bearings kept in trim. G. H. Menefee..*658
How much shaft current can a bearing carry safely? L. W. Riggs.....*111
How to avoid damaging ball bearings..*628
How to safely remount ball bearings...*774
Pump loading improves bearing operation. Emil Whitman *472

BELTS

Design practice for high-speed flat-belt drives. F. C. Morton.....*681
Flywheel takes peak loads off flat belts. R. C. Moore.....*689
Keep lineshaft pulleys running true. B. R. Stewart 762
Lineshaft flywheels produce smooth flat-belt operation. F. C. Morton.....*451
V-belts connect 1500-hp engine to load in flour mill *739
Blackout factory problem solved by diesel-steam plant *321

BOILERS

ABC of boiler stresses. Harry Spring...*173
Blowdown piping. Aalviani, Viotti, Bronson, Griffel, Wilkes, Hamilton, Chamberlain, Cannon, Greer, Bailey, Wenit, Breen, Kincaid.....*692
Blowdown tank. A. E. Stevenson..... 269
Boiler construction, cleaning and inspection. Alex Higgins (Questions and Answers) *54
Boiler feedwater heating and treatment. Alex Higgins (Questions and Answers) pt. 1, 696; pt. 2, *770
Boiler foundations and erections. Alex Higgins (Questions and Answers)....*123
Caulking water-leg staybolts with special tool. D. E. Grim.....*470
Cause of corrosion. J. S. Hamilton.....418c
Coal chute, flat, non-segregating? A. J. Stock *683
Coal feed to pulverizer. B. G. Switzer..*328
Coal-handling equipment should be matched to steam-plant needs. W. G. Hudson *448
Commonwealth Edison completes wartime unit at Fisk Station.....*654
Connecting blowdown tank. Clark, Mullen, Bongiorno, Parks, Caulden, Rinehart, Gerend *118
Draft and its control. Alex Higgins (Questions and Answers) 478
Early repairs prevent furnace failure. S. M. Elonka *467
Drip drain keeps boiler front clean. G. M. Wilson.....*691
Evaporative condenser built of scrap. Marquhardt & Holman.....*613
Feedwater regulator connections. L. D. Carlyon 269
Flashed steam from blowdown (Power's Data Sheets) 779
Float-actuated valve maintains water level. G. M. Wilson.....*117
Fuel and gas; facts about draft. Alex Higgins (Questions and Answers)....*406
Furnace tile repaired by high-temperature cement. E. J. Duff.....*764
Gage glass backed with striped card. H. A. Hess *764
Gas firing improved by balanced damper. G. M. Wilson *115
Hand firing and stoker firing. Alex Higgins (Question and Answers) 550
Hard-working boilers demand responsive feedwater control *307
Hoffmann-Stafford Tanning modernizes by installing new boiler.....*804
Homemade accessories step up boiler performance *242
Hookup provides deaerator for all drips. E. B. Kuhn *598
Lancing of slag from furnace doors prevented by plates. B. G. Switzer.....*619
Model solves valve-design problem for dredge pump steam engine. J. S. Kernachan *395
More makeup means more blowdown, but not much? W. Pack (charts)..... 755
Moving boiler in one piece (picture feature) 534

Page

Moving Navy Yard boiler saves four months and $75,000. G. F. Flay Jr....*105
Outdoor boilers lick floor space shortage at Goodyear Aircraft. G. M. Swengel.*502
Piston packing plugs feedwater line. Frank Smart *690
Precision testing for dissolved oxygen in boiler feedwater. J. F. Sebald pt. 1, *238; pt. 2, *360; pt. 3,.*444
Pressure variation in boilers. Cunningham, Kruse, Holman, Price, O'Brien, Cannon, Clark, Greer, O'Dell, Weslowski 546
Prevent fires inside pulverized coal system *651
Redesigned steam line relieves stresses. R. M. Orr *473
Schedule for cleaning boilers numbered on soot blowers. Joseph Bongiorno.. 117
Richfield Oil's refinery, Los Angeles, boosted aviation fuel output with semi-outdoor boiler plant.....*731
Should blowers be shut down while refueling. Chamberlain, McNally, Holman, Wenig, Bachmann, Gozdenovich, Clark, Mullen, Cannon, Salviani.....*402
Some important fuel facts. Alex Higgins (Questions and Answers) 266
Steam generation *92
Storing flexible copper steam hose. S. M. Elonka *187
Traveling-grate stoker maintenance hints. K. M. White..... 470
Tube cleaner driven by air engine. E. Darney *44
Tube cleaner is driven by flexible shaft. James Lee *401
Turnbuckle lines up furnace arches. E. J. Duff *837
Typical boiler repairs. Alex Higgins (Questions and Answers) *192
Water column connections. Joseph Bongiorno 411
Water level indicated by red pointer. G. M. Wilson.....*261
Waterwalls double old boilers' output. L. J. Westin *523
What causes carryover? Mullen, Rinehart, McNally, Holman, Clark.....*188
What causes unequal water level? Clark, Calvert, Campbell 474
What size condensate tank? Nobis, Meyer, Clark, Butcher..... *48
Windowless boilerhouse serves Chevrolet forge plant. C. A. Springer.....*664
Wyman-Gordon modernizes by replacing twelve oil boilers with six new ones..*822
Wyomissing Industries replaces seven old boilers with a pulverized-coal-fired unit. J. H. Rohrer..... *33
Buyers' Guide ....Mid-Dec.

C

COAL

Alloy cast-iron grinding balls cut cost of pulverizing anthracite. C. H. Frick...*437
Anthracite barley mixed with bituminous to stretch coal supply. E. E. Finn.. *6
Can you use a less critical coal successfully? H. F. Eastwood.....*325
Coal chute, flat, non-segregating? A. J. Stock *683
Coal feed to pulverizer improved. B. G. Switzer *328
Coal-mine manpower a critical problem 597
Coal put in storage hydraulically. M. N. Gozdenovich *544
Exhaust gas from internal combustion engine used to carbonite coal..... 169
Fire prevention inside a pulverized coal system *651
Forecast indicates tighter coal situation 79
Hell Gate Station modernizes with new coal-handling system, new boilers and new turbine *806
Hoffmann-Stafford Tanning finds compact coal-handling layout improves operation *804
How to avoid errors in analyzing high-moisture coals. L. F. Chaney..... *26
1923 truck solves 1942 coal problem. George Moreland *836
U. S. Bureau of Mines working on coal projects 509

COMBUSTION

Facts about pulverized fuel, gas, oil and combustion. Alex Higgins (Questions and Answers) *624
Fuels and combustion..... *86
How to convert a gas analysis. E. N. Kemler *513
Compressed Air, see Air Compressors

(*) illustrated. (Ed) Editorial

Page

CONDENSERS

Evaporative condenser built of scrap. Marquhardt & Holman *613
Turnbuckle eases condenser head removal. F. A. Furer *471

CONTROLS

Ac adjustable-speed drives power underfeed stokers. I. L. Nevells *108
Automatic industrial load control increases power-service reliability. Lau & Padon *389
Dual control keeps compressor on the job. Carl Bachman *186
Electro-pneumatic control for heavy contactors. G. W. Heumann *156
Float control holds submergence on condensate pump suction. A. S. Frank *296
Hard-working boilers demand responsive feedwater control *306
Right light in right place for control-room visibility. Kahler, Macgahan & West *734
Time switch controls electrical heaters. R. Boettinger *45

COOLING TOWERS

Aftercooler for dry compressed air. H. B. McDermid *763
Railroad cars carry specially designed power generating plants *358
Utah Copper's power plant depends upon atmospheric cooling towers for rejection of low-level heat. E. J. Franklin *2
Corrosion—Furnace-wall-tube external corrosion 899

COSTS AND PERFORMANCE

Costs and performance—Classify your power costs. B. J. George *391
Coal-yard screenings mixed with slack bituminous helps the coal shortage. H. F. Eastwood *325
Diesel performance here and abroad (charts) 677
Homemade accessories step up boiler performance *242
May & Bigley Co. installs own power plant to burn refuse and pays out in 1½ years. L. O. Gregg *14
Ponca City's diesel record (tables) *510
Power rate charges can be made more economical by retiming intermittent loads. B. J. George *434
Welding diesel jacket saves $3742. R. C. Wilson 110

D

Diver rescues dunked generator. N. L. Rea *466
Drafting—"Dizzy diagrammatics" save time in drafting room. H. E. Pilkington *177
Dust collection—ceramic dust collectors beat wartime steel shortage. L. C. Whiton *20

E

Edwards, George, Budget to be, 849. Candid-(ate)ly speaking, 177. Christmasses to come, 909. Greener pastures, 199. Horse-and-buggy engineers, 703. Little sacrifice, big complaint, 59. A man can grow, 413. The "no" man, 485. Paradoxes of paper, 631. Pessimist vs. optimist, 271. Tomorrow's training, 557. Turbine song, 129. Watchword: economy, 343.

ELECTRICITY

Ac adjustable-speed drives power underfeed stokers. I. L. Nevells *108
Ammeters prevent motor overloads. J. B. Mullens *618
Ammeter rebuilt for new range. Kenneth Collins 187
Automatic industrial load control increases power-service reliability. Lau & Padon *389
Basic magnesium requires more than 4 million kw. hr. daily from Boulder Dam's output *319
Brass ring upsets meter readings. Frank Smart *837
Brush operation faults and remedies (Power's Data Sheets) pt. 1, 61; pt. 2, 131
Charts guide safe loading of power transformers. Sealey & Hodtum *179
Check list for power planning 799
Coarse or fine sandpaper for sanding-in commutator. Evans, Chamberlain, Spencer, Sundquist, Butcher, Bongiorno, Clark, Coulden *50
Commutator and brush difficulties. W. C. Kalb *759
Commutator V-ring repair. J. B. Mullens *542
Correcting reversed dc polarity. Joseph Bongiorno *691
Electro-pneumatic control for heavy contactors. G. W. Heumann *156
Electronic frequency converter discussed at AIEE meeting *537
Electrons—powered by electrons. F. A. Annett *215-238
Explosion-proof motors for hazardous-gas locations. E. F. Wehlage *517
File brush cleans insulation off wires. O. C. Mills 545
Flap meter checks team waste 780b
Generator hookup. McCormack, Coulden, Norman *334
Giant power units for land and sea *176
How is this motor wired? Hecht, Coulden, Maher, Roberts, Griffel, Norman. 622
How much shaft current can a bearing carry safely? L. W. Riggs *111
Improved operating practice for steam turbine-generators *372
Instrument panel made shockproof. J. C. Albright *400
Landers, Frary & Clark modernizes with new switchgear *818
Magnetic couplings for induced draft fan drive. L. M. Exley *508
Magneto guards reduce maintenance costs. G. M. Wilson *331
Mercury contactor speeds coil testing. *473
Old street car generators reconditioned to charge submarine batteries *181
Personal Products purchases electricity from utility and meters power services. S. Senko *728
Power distribution systems planned to load requirements. R. H. Kaufmann. *16
Power for peace. Tucker & Rowley (charts) *573-588
Power-generating plants mounted on specially designed railroad cars *358
Power rate charges can be made more economical by retiming intermittent loads. B. J. George *434
Power trains of 5000-kw. follow allied armies. C. M. Laffoon *441
Reed-Prentice replaces obsolete power-distribution system *813
Remodeled power-distribution system at Liberty Tool & Gage Works *648
Revamping returns 27-year old generator to service. E. Simpson *835
Revamping 25-cycle generators for 60 cycle capacity. C. W. Diehl *258
Rotor cleaning by airblasting *541
Shoup-Owens modernizes with new controls and other low-cost improvements *816
Sparking at brushes of dc machines. W. C. Kalb *851
Sticking brush reversed exciter polarity. L. P. Carry 616
Synchronous condenser. L. W. Riggs *528
Synchronous motor journals need a lift. L. W. Riggs *251
Synchronous-motor selection guide. K. M. Patterson (Power's Data Sheets) 851
Time switch controls electrical heaters. R. Boettinger *45
Transformer maintenance check chart (Power's Data Sheets) 487
Two large silent-chain drives in space of one coupling. J. D. Walsh *327
Electronics—powered by electrons. F. A. Annett *215-238
Engineers—the old chief—case histories. William Doran 32, 107, 174, 246, 318, 460, 532, 678, 750

ENGINES—DIESEL AND GAS

Aluminum plant is powered by world's largest gas-engine plant *720
ASME Tulsa meeting discusses what's ahead for diesels *464
American contribution to gas turbine development. C. C. Jordan ..... pt. 1, *370; pt. 2, *520
Australia's power future calls for steam, hydro and diesel. J. G. Shotwell *746
Barge "Electra" floating diesel-electric power plant *827
Diesel crankshafts, connecting rods and bearings kept in trim. G. H. Menefee. *658
Diesel engines need clean air. A. R. Ciotti 471
Diesels, gas engines *96
Diesel governor shaft repair. S. M. Elonka *764
Diesels—how to figure diesel mep. and hp. from indicator diagrams *301
Diesels—how to hookup diesel indicators *244
Diesel injection section *373-388
Diesel performance here and abroad (charts) 677
Diesel-steam plant solves blackout-factory problem *321
Exhaust gas from internal combustion engine used to carbonize coal 169
Flywheels—safe speeds for cast-iron flywheels. T. C. Rathbone *239
Gas engines make power and heat from sewage *144
How to keep your diesel on its toes *161
How to plan gas-compressor plants for efficiency. Bruno Thiel *170
Magneto guards reduce maintenance costs *331
Pipeline gas engines make their own fuel from crude oil *168
Ponca City's diesel record (tables) *510
Tin cans protect gas engines *185
Truck shaft solves alignment problem. J. C. Albright *330
Victory ship diesel tests reveal performance *438
Wartime maintenance of diesel valves and gear. G. H. Menefee *595
Welding diesel jacket saves $3742. R. C. Wilson 110

ENGINES—STEAM

Corliss-engine driven paper machines adjusted by governor drive. J. H. Oakes *616
Correct receiver pressure for corliss pumping engine. Yaxley, Colden, Salviani, Ciotti, Chamberlain, Holman, Griffel, Theuman, Patterson, Webber. *839
Homemade hone trues engine cylinder. D. A. Burma *618
Idler wrecks 50-year-old steam engine. *324
Model solves valve-design problem. J. S. Kernachan *395
Turbines and steam *94
Wiper rings keep water out of crankcase. George Holman *473

EQUIPMENT

Air compressor 560b
Air compressor separator *635c
Air filter 351c 630
Airline separator *848
Air trap, snap-action 630
Autotransformer, aircraft *709b
Balancing equipment *282c
Ballast, Fluorescent *562b
Ballast, high-voltage *634a
Ballast, streamlined *563b
Ballasts, two-way *785a
Boiler, steam *342
Boiler tube expander-driver 483
Bricks, fireclay 351c
Brush, power-driven 561c
Bucket, clamshell *282b
Cabinet, goggle-cleaning *133c
Calculator, quick 133c
Capacitors *72b, 854c
Carbide-tipped tools *425c
Ceiling air cooler *783c
Cement, bushing 284b
Cement, iron 428a
Centrifugal governors *848
Chemical feeder *785a
Circuit breaker air *71b, 630
Circuit breaker, Deion 848
Circuit breaker, fuse 855a
Clamp, wire-rope 284c
Cleaner, alkali 636a
Cleaner, brush 426b
Clutch, friction *270
Coal feed agitator *635c
Colorimeter, photoelectric 428b
Combustion control *282a
Condensate-return system 848
Condenser-tube protectors *710a
Conduit housing 630
Conduit, underground 776
Connectors, flexible 785b
Controller, adjustable speed-drive 426a
Controller, air-operated *855c
Controller, circuit *709c
Controller, compressor *427c 702
Controller, electronic motor *484
Controller, electronic preset speed *498b
Controller, floor-operated *783b
Controller, fuse *128
Controller, level 206b
Controller, pneumatic *71c
Controller, temperature *427a
Controller, water-level *497c
Controllers and refinements *709a, *776
Conveyor elevator system 412
Counterbore and spotfacer *132b
Coupler, prefabricated conduit *498c
Coupling, self-flaring *784a
Coupling, shrouded flexible *556
Coupling, splined shaft 561a
Current collector *635b
Current-regulating compensator *500a
Cutter *708b
Damper, reverse-flow *782b
Diesel air filter *784a
Diesel engines *270 ..... *630
Directory of manufacturers ..... Mid-Dec.
Drill sharpener *710c
Drive, variable-speed *854c
Drum indicator 635c
Dust collector 283c
Dynamotor, four-in-one 133a
Electrode, aluminum-bronze 427b, 483
Electrode, shielded arc 710b
Electrode, welding *206b, 562c
Electrode holder 284c, 634a, 855b
Electronic exciter unit *556
Electronic flame guard 282c
Electronic flow-control *483
Electronic oscillograph 707c
Ellipse maker *709a
Exhaust head *498a
Exhauster, wind-actuated *563a
Expansion fitting *784b
Extinguisher, wheeled 428a
Fan *128, 132a
Feedwater test kit *776
Filter, aftercooler separator *342
Filter, air *198
Filter, fuel-oil *484
Filter, intake *428c
Filter, oil separator *484
Fire extinguisher *207a, *560c
Firebox flame indicator *710a
Flaring tool 132a
Flashlight battery *709c
Floor covering, plastic 561c
Floor runner, composition 561b
Flowmeter, area *484
Flowmeter, propeller main-line *483
Fluorescent fixtures 708c, *783b, *784c
Fluorescent lighting unit 426b
Frame construction 497c
Fungicidal concentrate 634c
Furnace, hot-gas generating 283b
Furnace, water arch 562b
Fuse cutouts *484
